BUILDING PERMITS

Building permit fees are based on the valuation of the project. The Building Official calculates the valuation of work for all permits. The valuation listed on the application shall be an estimate of the fair market value of construction including all labor and materials and may not be the same valuation calculated by the Building Official during review.

The Building Official calculates valuation using the most recent edition of the Building Valuation Data (BVD) Square Foot Construction Costs Table published by the International Code Council multiplied by Enumclaw's modifier of 0.85 and gross square footage. The BVD table is based on new construction. The following percentages apply to the valuation of different work types, as described in the permit application scope of work:

- New construction, shell buildings, additions, etc: 100% of BVD
- Tenant Improvement/Interior Remodel/Change of Occupancy: 20% of the rate in the BVD
- Accessory Structures \geq 600 gross square feet, such as garages, decks, porches: 100% of the "Utility, miscellaneous" rate in the BVD
- Accessory structures under 600 gross square feet such as sheds, porches, greenhouses, gazebos etc: The valuation listed on the application shall be used concurrent with the approval of the Building Official
- Structural alteration to existing building, equipment, commercial re-roof, commercial coach, similar construction not falling into another category: The valuation listed on the application shall be used concurrent with the approval of the Building Official.
